

## CLAIMS

1. A crystal for an oral solid medicament of an indoline compound represented by the formula:

which shows an X-ray powder diffraction pattern characterized by main peaks of  $5.5^{\circ} \pm 0.2^{\circ}$ ,  $6.1^{\circ} \pm 0.2^{\circ}$ ,  $9.8^{\circ} \pm 0.2^{\circ}$ ,  $11.1^{\circ} \pm 0.2^{\circ}$ ,  $12.2^{\circ} \pm 0.2^{\circ}$ ,  $16.4^{\circ} \pm 0.2^{\circ}$ ,  $19.7^{\circ} \pm 0.2^{\circ}$  and  $20.0^{\circ} \pm 0.2^{\circ}$  as  $2\theta$ .

2. An oral solid medicament for dysuria treatment comprising as an active ingredient the crystal as claimed in claim 1.

3. A medicament as claimed in claim 2, which comprises as a further active ingredient at least one member selected from a group of an  $\alpha_1$ -adrenoceptor blocking agent except for the indoline compound represented by the formula:

an anticholinergic agent, a 5 $\alpha$ -reductase inhibitor, a sex hormone agent, an antianxiety agent, a cholinergic agent, a cholinesterase inhibitor, an antiinflammatory agent and an antibacterial agent.

4. A medicament as claimed in claim 2 or 3, wherein the dosage form is capsules or tablets.

5. A medicament as claimed in claim 4, wherein the capsules is filled in a light shielding capsule or the tablets is coated by

a coating material with a light shielding effect.

6. A medicament as claimed in claim 5, wherein the light shielding capsules is a capsule containing titanium oxide.

7. A medicament as claimed in claim 5, wherein the coating material with a light shielding effect is a coating material containing titanium oxide.

8. A medicament for dysuria treatment which comprises combining a medicament as claimed in claim 2 with a medicament comprising as an active ingredient at least one member selected from a group of an  $\alpha_1$ -adrenoceptor blocking agent except for the indoline compound represented by the formula:

an anticholinergic agent, a 5 $\alpha$ -reductase inhibitor, a sex hormone agent, an antianxiety agent, a cholinergic agent, a cholinesterase inhibitor, an antiinflammatory agent and an antibacterial agent.

9. A medicament as claimed in any one of claims 2 to 8, wherein the dysuria is caused by dysuria associated with urethra organized obstruction, dysuria associated with a disorder of urination control nerves or dysuria associated with urethra functional obstruction.

10. A medicament as claimed in any one of claims 2 to 8, wherein the dysuria is caused by prostate hypertrophy, urethra stricture, urethra calculus, prostate cancer, neurogenic bladder or lower urinary tract disorders.
